

# DRILLING METHODS AND TECHNIQUES IN RESOURCE EXPLORATION

**THE ONLINE COURSE IS AVAILABLE TO START AT ANY TIME**

Frequently, geologists are placed on drilling projects with very little understanding of the drilling operation. In order to effectively contribute to managing the project, geologists require at least a basic level of understanding of drilling principles and the drilling operation as a whole. This course will provide newly qualified geologists, that have had little or no exposure to drilling operations with a fundamental understanding of selected aspects of a drilling operation. It also serves as a valuable refresher for seasoned geologists.
