Vacancy: Drilling and Remediation Field Operations Supervisor

RemedX has a vacancy for a Drilling and Remediation Field Operations Supervisor. The position will be based in Kloof, Kwazulu-Natal. The position will report to the Managing Director of RemedX.

Role Summary

Field operations supervisor responsibilities in general include planning, coordinating, directing, and managing the daily activities of the assigned drill or remediation work by supervising the staff members.

Key Responsibilities

- Responsible for the overall supervision and training of the staff members to provide the necessary guidance.
- Coordinates the field activities so that daily, short term, and long-term production objectives can be achieved and also closely monitors the progress of the work.
- Studies what equipment is necessary for effective field operation and assists in its procurement and makes sure that it is as per the given specifications.
- May also be involved in the recruitment process, reviewing, and evaluating the performance of the subordinates and also makes sure that discipline and SHEQ policies are being followed in the field.
- Ensures that the construction site is safe and trains the supporting staff members on the operation of the equipment safety procedures and provides an insight into the company's policies.
- Studies the blueprints to determine the requirements and delegates the work according to priority.
- Determines estimates for the material needed as well as the labour requirements.
- Ensures that the project work is carried out as per the assigned schedule and resolves all the construction problems immediately, to improve productivity.
- Keeps records of the relevant production and construction data in the form of reports and provides a constructive feedback to the employees by providing solutions to improve efficiency.

Qualifications/knowledge, skills and experience

Diploma/Bachelor's Degree: Earth Science or similar, or training with certification completed within the Earth Science field

Previous work experience in a supervisory position or field operations experience

Work Environment

The work may be physically strenuous and requires an individual standing for long hours on the field while carrying out supervisory functions. The individual will be required to work overtime in case a project needs to be completed within the given time limit. The employee is frequently exposed to inclement weather, fumes, or airborne particles, toxic or caustic chemicals, and vibration. The individual will be exposed to loud noise levels.

Essential Skills

- A field operations supervisor should have a basic understanding of management and organizational skills with an ability to supervise and lead the team to achieve the goals and objectives of the organization.
- The individual must be able to plan the work according to the priority standards, so that it is completed within the established budget and given time.
- Must be able to incorporate team participation and involve them in decision making.
- Must be comfortable handling and analysing data and records and prepare the relevant reports.
- Should have effective communication skills with a vision to develop innovative plans to ensure better productivity.
- Must possess a valid driver's license.
- Must have knowledge of operation and use of motorized vehicles and equipment, including drill rig, 4ton truck, pickup truck, pumps, remediation equipment, compressors, generators, common hand and power tools, shovels, wrenches, and electronic motors.
- Must be medically fit.

Remuneration:

Total Cost to Company Package will be negotiated according to the candidate's knowledge and experience.

Only candidates that meet the above requirements should submit their CVs to careers@gcs-sa.biz by no later than the 09th April 2021.

Should you not receive any communication within 2 weeks of the closing date, please consider that your application was unsuccessful.
