

GEOCONGRESS 2023

11-13 JANUARY

The next 125 years of Earth Sciences

Geocongress goes hybrid!!

Abstract submissions extended to 15 October

Given the vast interest from Earth Science colleagues in other parts of Africa, and also further afield globally, the organising committee has taken the decision to make Geocongress 2023 a hybrid style event. To best facilitate and stimulate interpersonal interactions, the event remains primarily an in-person event and current registration- and abstract submission numbers show promise of an exciting and well attended delegate contingency. If you haven't already submitted an abstract, be sure to get it in soon!

Abstract submission: <https://allevents.eventsair.com/geocongress/abstracts>

For online attendees, the hybrid option will offer an opportunity to live stream all talks (in both parallel scientific sessions), to present their own research by means of a virtual poster session and limited oral presentation slots, and access and interact with the virtual exhibitor stands. All attendees (both in-person and online) will receive certificates of attendance.

In order to allow sufficient time for the online delegates to submit abstracts, the deadline for abstract submission has been extended to 15 October 2022. Announcement of successful abstracts will then be pushed to 5 November, with registrations closing on 30 November 2022. There are still several places available on some of the field trips and workshops, which you are strongly encouraged to check out: <https://allevents.eventsair.com/geocongress/workshops-and-excursions>
