

The Northern Cape Branch of the Geological Society of South Africa
Executive Committee and Additional Members
2022

"In a world where nothing ever stays the same, we all need to change, evolve, succeed...and change again".

That is what we have done, together. The Northern Cape Branch, through Covid19 Lockdown, focused on maintaining stable branch function and momentum gained since the reconstitution in 2019. Through this time, the branch has seen success, building from strength to strength. From the event at Red Sands, long before Covid19 outbreak, meeting atop of Rhenosterkop hill, and recently being hosted by Orion Minerals in Copperton while the committee finalized 2022 major events and milestones. All these events highlight our commitment and mark our collective intention of creating a social venue for the group of individuals interested in the sustainability of the Northern Cape a heart-felt reality.

Indeed, change has come again. This time in the form of a new committee, which is a kaleidoscopic union of passionate, skilled and playful leaders. These leaders take the branch forward to the next milestones. Together, we'll continue to drive the success of the Branch and the interest of the stakeholders. Below are the face of the members trusted to lead the branch. Of course, none of this would be possible, as always, without the sponsors. Join us in making sure that we have an even better 2022.
