

# PROFESSIONALISM AND CODE OF ETHICS

*Free Online Course*

11 OCTOBER 2022

The term "ethical behaviour" is applied to a person's conduct in professional matters and is judged in comparison to the standards of the profession, which are formally expressed in statements called codes of ethics. Codes of ethics are the value guidelines that a professional must follow in order to remain registered as a member of the profession.

Ethical conduct, or professional decision-making, is a necessary requisite to being called a professional. A professional must be able to properly balance competing values in making decisions that affect both society and the client.

**This online course by Dr Tania Marshall provides an understanding of what you need to be a professional in the mining industry.**
